California Teachers Association v. Riles: Textbook Loans to Sectarian Schools

In California Teachers Association v. Riles, the Supreme Court of California held that a state program providing loans of textbooks, without charge, to educational institutions with religious affiliations violated article IX, section 82 and article XVI, section 53 of the California Constitution, which prohibit public assistance for the support of sectarian schools. The court ruled that determining the validity of the loan program required a two-pronged inquiry: whether the program only indirectly benefits parochial schools, and whether the character of the benefit results in the support of a sectarian school. Applying the first prong, the court concluded that the schools more than indirectly benefited from the program because the benefits accruing to both the students and the schools were "inseparable." Under prong two, the court found that the benefit supported sectarian schools by advancing their educational function. In so holding, the court rejected the theory that the aid would be valid if the child were the direct beneficiary, as well as the presumption that secular books would not be used to teach religion—rationales employed by the United States Supreme Court to uphold three similar textbook loan programs under the first amendment's establishment clause.

Part I of this Note sets forth the facts and decision of the case. Part II discusses the legal background surrounding Riles. Finally, Part III analyzes the court's opinion. This Note argues that the court did not properly construe the California Constitution because it responded to the first amendment establishment clause rather than to the appropriate state provisions; that a literal construction of the California provisions

2. Id. at 813, 632 P.2d at 964, 176 Cal. Rptr. at 311. CAL. CONST. art. IX, § 8 states: "No public money shall ever be appropriated for the support of any sectarian or denominational school, or any school not under the exclusive control of the officers of the public schools . . . ."
3. 29 Cal. 3d at 813, 632 P.2d at 964, 176 Cal. Rptr. at 311. CAL. CONST. art. XVI, § 5 states:

Neither the Legislature, nor any county, city and county, township, school district, or other municipal corporation, shall ever make an appropriation, or pay from any public fund whatever, or grant anything to or in aid of any religious sect, church, creed, or sectarian purpose, or help to support or sustain any school, college, university, hospital, or other institution controlled by any religious creed, church, or sectarian denomination whatever; nor shall any grant or donation of personal property or real estate ever be made by the state, or any city, city and county, town, or other municipal corporation for any religious creed, church, or sectarian purpose whatever . . . .
most accurately reflects the constitution's objectives; and that the \textit{Riles} two-pronged test does not achieve the objectives of article IX, section 8 or article XVI, section 5 because it allows forms of public assistance which would be prohibited by a literal construction of the constitution.

I

\textbf{The Case}

\textit{A. The Facts}

In 1972, the California Legislature enacted what are now sections 60315\textsuperscript{4} and 60246\textsuperscript{5} of the California Education Code, establishing a program for lending state-adopted textbooks to nonpublic\textsuperscript{6} school students in grades kindergarten through eight. Under section 60315, pupils enrolled in a nonpublic school could request the loan of text-

---

4. Originally enacted as Education Code § 9505, \textit{CAL. EDUC. CODE} § 60315 (West Supp. 1982) provides:

The Superintendent of Public Instruction shall lend to pupils entitled to attend the public elementary schools of the district, but in attendance at a school other than a public school under the provisions of Section 48222, the following items adopted by the state board for use in the public elementary schools:

(a) Textbooks and textbook substitutes for pupil use.
(b) Educational materials for pupil use.
(c) Tests for pupil use.
(d) Instructional materials systems for pupil use.
(e) Instructional materials sets for pupil use.

No charge shall be made to any pupil for the use of such adopted materials.

Items shall be loaned pursuant to this section only after, and to the same extent that, items are made available to students in attendance in public elementary schools. However, no cash allotment may be made to any nonpublic school.

Items shall be loaned for the use of nonpublic elementary school students after the nonpublic school student certifies to the State Superintendent of Public Instruction that such items are desired and will be used in a nonpublic elementary school by the nonpublic elementary school student.

5. Originally enacted as Education Code § 9445, \textit{CAL. EDUC. CODE} § 60246 (West Supp. 1982) provides:

The State Controller shall during each fiscal year, commencing with the 1978-79 fiscal year, transfer from the General Fund of the state to the State Instructional Materials Fund, an amount of thirteen dollars and thirty cents ($13.30) per pupil in average daily attendance in the public and nonpublic elementary schools during the preceding fiscal year, as certified by the Superintendent of Public Instruction, except that this amount shall be adjusted annually in conformance with the Consumer Price Index, all items of the Bureau of Labor Statistics of the United States Department of Labor, measured for the calendar year next preceding the fiscal year to which it applies. For purposes of this section, average daily attendance in the nonpublic schools shall be the enrollment reported pursuant to Section 33190.

6. \textit{CAL. EDUC. CODE} § 60026 (West 1978) defines a "nonpublic school" as one which satisfies the requirements of Education Code § 48222 (detailing the requirements for a private school whose students are exempt from attending public school) and is exempt from taxation under \textit{CAL. REV. & TAX. CODE} § 214 (West Supp. 1982) (granting tax exemptions to schools of less than collegiate grade that are "owned and operated by religious, hospital, or charitable funds, foundations or corporations.")

While § 60315 does not on its face confine the loan program to nonprofit, nonpublic schools, as a result of the three aforementioned statutes, students attending private \textit{for-profit} schools are not included in the program. \textit{See Riles}, 29 Cal. 3d at 799, 632 P.2d at 955, 176 Cal. Rptr. at 302.
books from the list of books approved and adopted by the state board of education for public school students. The nonpublic school could, on behalf of its individual pupils, place an order directly with the Department of Education, but officially the loans were given to individual students pursuant to requests from their respective parents. Upon receiving an order, the department ordered textbooks from the state printer or from other publishers and shipped them directly to each nonpublic school for distribution to the borrowing pupils.

The program was funded through a transfer of monies from the state general fund to the state instructional materials fund at the rate of thirteen dollars and thirty cents ($13.30) per pupil in average daily attendance in the public and nonpublic elementary schools during the preceding fiscal year.\(^8\) By 1977, the cost of the program to the state was approximately two million dollars.\(^9\)

Of the schools participating in the loan program in 1975, 87 percent were religious schools, with the Catholic church operating 72 percent of these religious institutions.\(^10\) While these Catholic schools offer instruction in secular subjects, they also teach the tenets of their faith. Some of the schools give enrollment preference to Catholic pupils, and most require students to receive religious instruction, attend religious services during the day, and participate in prayers and religious ceremonies.

The California Teachers Association\(^11\) and others challenged sections 60315 and 60246 of the Education Code on the grounds that the statutes violated the establishment clause of the first amendment to the United States Constitution\(^12\) as well as article IX, section 8 and article XVI, section 5 of the California Constitution. Plaintiffs filed two separate actions: the first sought a declaration that section 60315 was unconstitutional and an injunction prohibiting the superintendent of public instruction, the state board of education, and the state controller from complying with the provision; the second action alleged that the board administered the program in an unconstitutional manner and also sought declaratory and injunctive relief.

---

7. The order could be for state-adopted textbooks or workbooks or for nonadopted textbooks and workbooks pursuant to CAL. EDUC. CODE § 60200 (c) (West Supp. 1982). Teachers' editions of textbooks, teachers' manuals, and other directive materials for teachers were excluded from the loan program.

8. \(\text{See supra note 5 for full text of § 60246.}\)

9. 29 Cal. 3d at 799, 632 P.2d at 955, 176 Cal. Rptr. at 302.

10. These figures were cited by the Riles court as having been presented in evidence in the first case. \(\text{Id.}\)

11. The California Teachers Association is a union representing approximately 197,000 California public school teachers.

12. U.S. CONST. amend. I states: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof . . . ."
The trial court ruled that both the statutes and the administration of the program were constitutional. The court of appeal affirmed on both counts, holding that the benefits accruing to the nonpublic schools were both indirect and incidental. It therefore concluded that, under the United States Constitution, such indirect and incidental benefits to religious schools are permissible as long as the direct beneficiaries of the loan program were individual pupils and their parents. The court also held that the loan program did not violate the California Constitution because it involved neither official state participation in activity having the direct, immediate, and substantial effect of promoting religion, nor the expenditure of public money for the direct benefit of any sectarian school.

B. The Opinion

The supreme court reversed, concluding that section 60315 was unconstitutional because it violated both pertinent provisions of the California Constitution. The court held that in assessing the validity of the loan program it is necessary to consider two questions: whether the aid only indirectly benefits the school, and whether the character of the benefit is such that the aid furthers the educational function of the school. In applying prong one, Justice Mosk, writing for the majority, rejected the “child benefit” test used by the United States Supreme Court to uphold similar textbook loan programs in three prior instances. Under this theory, if the financial benefit provided by the program accrued to the children and their parents rather than to the schools, if no funds or books were furnished to the school, and if ownership of the books remained “at least technically” in the state, then any indirect benefits to the school did not advance the school’s religious mission. Justice Mosk declared that “it is an undeniable fact that books are a critical element in enabling the school to carry out its essential mission to teach the students”; thus the textbook loan program benefits both the school and the child. Such benefits could not be characterized as remote to one party and direct to the other because the benefits are inseparable.

Applying the second prong, the court held that the loan program violated the California Constitution because the loan of textbooks,

13. 29 Cal. 3d at 798-99, 632 P.2d at 955, 176 Cal. Rptr. at 302.
15. 29 Cal. 3d at 807-12, 632 P.2d at 961-64, 176 Cal. Rptr. at 308-11 (citing Wolman v. Walter, 43 U.S. 229 (1977); Meek v. Pittenger, 421 U.S. 349 (1975); Board of Educ. v. Allen, 392 U.S. 236 (1968)).
16. 29 Cal. 3d at 810, 632 P.2d at 963, 176 Cal. Rptr. at 310.
which have doctrinal content, resulted in support for the educational function of the school. In so concluding, the court further rejected "the [presumption of neutrality] rationale . . . that a textbook loan program may be justified on the ground that it should not be assumed that the parochial schools in which the books are used will employ the secular texts to teach religion." Instead, the court found that the secular and sectarian functions of the school are so inextricably intertwined that any aid to the educational function of the school automatically benefits its religious mission.

II
LEGAL BACKGROUND

A. The California Constitution

*Riles* raises the issue of whether a program by which textbooks are loaned at public expense to educational institutions with religious affiliations is constitutional in light of article IX, section 8 and article XVI, section 5 of the California Constitution. Although no California cases have decided the specific issue of textbook loans to religious schools, two pre-*Riles* decisions are of significance because they have addressed the issue of aid to parochial schools under the California Constitution.

In the first case, *Bowker v. Baker*, the court of appeal ruled that legislation authorizing the transportation of parochial school pupils in buses owned and operated by a public school district did not violate what are now article IX, section 8 and article XVI, section 5 of the California Constitution. *Bowker* held that where the main purpose of an enactment is lawful, the fact that an incidental benefit not permitted by law accrues to some person or organization will not alone defeat the legislation. As a result, the court concluded that the challenged busing program fell under the state's broad police powers to promote the educational welfare and safety of its citizens and that the direct benefit of the legislation flowed to the children, while only an indirect benefit went to their private parochial school.

25. Id. at 666-67, 167 P.2d at 263.
In *California Educational Facilities Authority v. Priest*, the California Supreme Court upheld a statute creating a public agency through which private colleges could obtain financing for educational facilities at a lower rate of interest than would be available through conventional financing. Such assistance was valid under article IX, section 8 because it did not require the appropriation of public money, and any indirect or incidental benefits accruing to the schools would not violate this provision. In addition, the court interpreted article XVI, section 528 to forbid "any official involvement, whatever its form, which has the direct, immediate, and substantial effect of promoting religious purposes," and therefore to allow sectarian schools to receive indirect, remote, and incidental benefits from a statute with a secular primary purpose. Although the court found in this provision a broader prohibition than that of article IX, section 8, it nevertheless ruled that the benefit resulting from low cost borrowing would only be incidental to the primary public purpose of promoting education by improving and maintaining educational facilities.

### B. The Establishment Clause

Although *Riles* was ultimately decided under the California Constitution, the *Riles* court's analysis and holding are tightly intertwined with the rationales and results of federal cases adjudicating the validity of textbook loan programs and of comparable forms of aid under the establishment clause of the first amendment to the federal Constitution.

To be valid under the establishment clause, a program giving public assistance to parochial schools must have a secular legislative purpose, it must not advance or inhibit religion, and it must not foster an excessive entanglement between government and religion. To assess the degree of entanglement, the court must consider the character and purpose of the institution benefited, the nature of the aid, and the resulting relationship between government and religious authorities. Additionally, a program might be invalidated if a court views it as

28. At the time *Priest* was decided, Article XVI, § 5 was Article XIII, § 24.
29. 12 Cal. 3d at 605-06 & n.12, 526 P.2d 521 & n.12, 116 Cal. Rptr. at 369 & n.12.
30. *Id.* at 605, 526 P.2d at 521, 116 Cal. Rptr. at 369.
31. *Id.* at 606, 526 P.2d at 521-22, 116 Cal. Rptr. at 369-70. Contributing to such a determination were these facts: the benefits of the act were granted to sectarian and nonsectarian colleges on an equal basis; the aid for religious projects was strictly prohibited, *see id.* at 596, 526 P.2d at 515, 116 Cal. Rptr. at 363; and no financial burden was imposed on the state. *Id.* at 606, 526 P.2d at 521, 116 Cal. Rptr. at 369.
33. *Id.* at 615.
causing an undue amount of political division along religious lines.\textsuperscript{34}

These tests have been developed over a number of years in several major cases. In Board of Education v. Allen,\textsuperscript{35} the seminal case on the subject of textbook loans, the United States Supreme Court applied the first two tests,\textsuperscript{36} legislative purpose and primary effect, and upheld the validity of a loan program similar to the one in Riles. In Allen, the Court reviewed a New York statute requiring local school boards to purchase textbooks and lend them without charge "to all children residing in [their] district[s] who [were] enrolled in grades seven to twelve of a public or private school which complie[d] with the compulsory education law."\textsuperscript{37} The books loaned were "textbooks . . . designated for use in any public, elementary or secondary schools of the state or . . . approved by any boards of education" and required as texts for a semester or more in a particular class in the school the borrower legally attended.\textsuperscript{38} The statute made the textbooks available at the request of the individual student, retained at least technical ownership in the state, and did not ask the student which school he or she attended.\textsuperscript{39}

The Court first held that the express purpose of the New York statute was to increase educational opportunities available to the young.\textsuperscript{40} It then utilized the "child benefit" rationale\textsuperscript{41} to determine that the effects of the statute were not contrary to its stated purpose:

\textsuperscript{34} See id. at 622-23. Lemon stated that "[a] broader base of entanglement of yet a different character is presented by the divisive political potential of these state programs." Id. at 622. The Court, however, did not clearly indicate the weight that the political divisiveness factor should carry, and commentators disagree as to what the Court intended. One commentator asserts that Lemon "was not clear as to whether the political divisiveness factor was merely the reason for strict application of the purpose-effect-entanglement test, a branch of the entanglement test, or a fourth test." J. Nowak, R. Rotunda, & J. Young, Handbook on Constitutional Law 855 (1978) [hereinafter cited as NOWAK].

On the other hand, a student commentator argues that the potential for such divisiveness does not necessitate invalidation of a statute; rather, that factor's presence should be treated as a "warning signal" of possible unconstitutionality. Note, Wolman v. Walter and the Continuing Debate over State Aid to Parochial Schools, 63 Iowa L. Rev. 543, 547 (1977). This latter interpretation of the Court's intention appears to be correct on its face because it is based upon the Court's ruling in Committee for Pub. Educ. v. Nyquist, 413 U.S. 756, 797-98 (1973). In Nyquist, the Court held that "while the prospect of such divisiveness may not alone warrant the invalidation of state laws that otherwise survive the careful scrutiny required by the decision of this Court, it is certainly a 'warning signal' not to be ignored." If the word "may" actually means "does," then the Iowa commentator would be entirely correct; however, if it actually means "may," thus leaving open the possibility that political divisiveness by itself could invalidate a statute, then NOWAK has a point well taken.

\textsuperscript{35} 392 U.S. 236 (1968).

\textsuperscript{36} Based upon previous cases, the two-part test was formally established in Abington School Dist. v. Schempp, 374 U.S. 203, 222 (1963).

\textsuperscript{37} 392 U.S. at 239.

\textsuperscript{38} Id.

\textsuperscript{39} Id. at 241, 243.

\textsuperscript{40} Id. at 243.

\textsuperscript{41} See supra text accompanying notes 15-16.
the books were furnished to the children, not to their parochial schools, and any resulting financial benefit accrued to children and their parents, not to the schools.\footnote{The Court further based its decision upon the presumption that secular textbooks would not be used to teach religion and that therefore their purpose would be neutral; the processes of secular and religious training were not so intertwined that secular textbooks furnished to students by the public would in fact be instrumental in the teaching of religion.\footnote{The Court stated: "Nothing in this record supports the proposition that all textbooks, whether they deal with mathematics, physics, foreign languages, history, or literature, are used by the parochial schools to teach religion." \textit{Id.} at 248.}} Since \textit{Allen}, however, the Court appears to have retreated from the child benefit and presumption of neutrality theories it used in \textit{Allen}. Furthermore, it has developed a third test—excessive entanglement.\footnote{Id.} This change in the Court's thinking has resulted in its refusal to extend the \textit{Allen} rationale to programs involving not textbooks, but public aid similar to textbooks. It has continued to uphold textbook loans under \textit{Allen} only as a matter of stare decisis.\footnote{\textit{Id.}}

Two cases, \textit{Meek v. Pittinger}\footnote{\textit{See supra} notes 32-33 and accompanying text.} and \textit{Wolman v. Walter},\footnote{433 U.S. at 229 (1977).} illustrate the Court's bifurcated approach. In both cases, the Court upheld the validity of textbook loan programs solely on the basis of \textit{Allen},\footnote{\textit{Wolman}, 433 U.S. at 237-38; \textit{Meek}, 421 U.S. at 359-62.} and refused to extend the \textit{Allen} rationale to loans of funds for instructional materials and equipment. In \textit{Meek}, the Court held that a Pennsylvania statute authorizing the loan of instructional materials and equipment\footnote{The materials involved were periodicals, photographs, maps, charts, recordings, and films. 421 U.S. at 355.} to parochial schools had the primary effect of advancing religion and was therefore unconstitutional.\footnote{\textit{Id.} at 363.} While \textit{Allen} was specifically based on the presumption that parochial schools could keep secular and sectarian functions separate, \textit{Meek} held that the secular education and the religious mission of the school were "inextricably intertwined,"\footnote{\textit{Id.} at 366. While the Court utilized in part the "inextricably intertwined" reasoning to invalidate auxiliary services (including guidance testing and remedial and therapeutic services provided by public school employees at the private schools) in \textit{Meek}, \textit{id.} at 367-73, and funds for field trips in \textit{Wolman}, 433 U.S. at 252-55, it also relied upon an excessive entanglement test. \textit{Meek}, 421 U.S. at 372; \textit{Wolman}, 433 U.S. at 254. For discussion of excessive entanglement test as applied in \textit{Wolman}, see infra text accompanying note 79.} and
that loans of instructional materials would therefore promote religion.

When Ohio attempted to avoid *Meek* by amending its statute so that the aid flowed directly to the children instead of to the school, the Court in *Wolman v. Walter*\(^5\) held the program invalid, thus further undercutting *Allen* by rejecting its child benefit theory. The Court observed that, despite the technical change in legal bailee, the program in substance was the same as before: the equipment was substantially the same; it would receive the same use by the students; and it could be stored and distributed on the nonpublic school grounds.\(^5\)\(^4\) Furthermore, while describing the status of the *Allen* presumption of neutrality in an important footnote to *Wolman*, the Court acknowledged and tried to resolve the tension between *Allen* and *Wolman*. It explained that *Allen* remained the law for textbooks only as a matter of stare decisis, but the Court chose to follow its post-*Allen* cases and not extend the *Allen* presumption of neutrality to other forms of public aid to parochial schools.\(^5\)\(^5\)

### III

**Analysis**

In *Riles*, the California Supreme Court stated that it based its decision upon the California Constitution.\(^5\)\(^6\) This Section argues that the state's objectives are best achieved by a literal reading of article IX, section 8 and article XVI, section 5. By not interpreting them literally, the court did not properly construe those provisions; it responded to first amendment establishment clause problems rather than California constitutional concerns. The court's two-pronged test would permit

---

53. 433 U.S. at 250.
54. Id.
55. Footnote 18 reads in part:
"Board of Education v. Allen has remained law, and we now follow as a matter of stare decisis the principle that restriction of textbooks to those provided the public schools is sufficient to ensure that the books will not be used for religious purposes. . . . It has been argued that the Court should extend Allen to cover all items similar to textbooks. When faced, however, with a choice between extension of the unique presumption created in Allen and continued adherence to the principles announced in our subsequent cases, we choose the latter course." Id. at 252 n.18.
56. 29 Cal. 3d at 797-98, 813, 632 P.2d at 954, 964, 176 Cal. Rptr. at 301, 311.
forms of public aid that would be prohibited by a literal construction of the provisions—a result contrary to the objectives of those provisions.

Unlike the establishment clause of the first amendment, the pertinent California constitutional provisions are explicit about the issues to be addressed in determining the constitutionality of state aid to parochial schools. That there is no hidden meaning is strongly supported by the intent and actions of the framers of the California Constitution. At the 1879 Constitutional Convention, the delegates approved article IX, section 8 to assure that public funds would be used to support only the public school system that they were creating in article IX of the constitution. In fact, the language was so clear that the clause was approved without significant debate, and its wording has remained unchanged since its proposal at the convention and its adoption by the people of California. Thus, from the beginning, the constitutional language prohibited state monetary support not only of any sectarian school but also of any school not under the exclusive control of officers of the public schools.

If article IX, section 8 leaves any doubt as to whether the state can give aid to parochial schools, article XVI, section 5 clearly dispels it. The convention debates indicate that that provision “was intended to insure the separation of church and state and to guarantee that the power, authority, and financial resources of the government shall never be devoted to the advancement of religious or sectarian purposes.” Such intent is plainly reflected in the wording of article XVI, section 5, which constitutes the “definitive statement of the principle of government impartiality in the field of religion.” Not only is the legislature or any governmental entity prohibited from ever making an appropriation, but it may never grant anything which aids any religious

57. Board of Trustees of Leland Stanford Junior Univ. v. Cory, 79 Cal. App. 3d 661, 665, 145 Cal. Rptr. 136, 138 (3d Dist. 1978). The legislature was given the power to establish a public school system by CAL. CONST. art. IX, § 1, which states that “[a] general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, the Legislature shall encourage by all suitable means the promotion of intellectual, scientific, moral and agricultural improvement.”

58. 79 Cal. App. 3d at 665, 145 Cal. Rptr. at 138.

59. Id. In another context, one delegate expressed concern about an “opposition system of schools arising against the common schools of the State.” Id.

60. See 29 Cal. 3d at 797, 632 P.2d at 954, 176 Cal. Rptr. at 301.

62. See supra note 3.

63. Priest, 12 Cal. 3d at 604, 526 P.2d at 520, 116 Cal. Rptr. at 368 (citing 37 Op. Att’y Gen. 105, 107 (1961)).
By the terms of both constitutional provisions, then, the relevant issues are whether there has been a public appropriation or a grant of "anything," whether the appropriation or grant is in aid of any religious sect, church, creed, or purpose or helps to support or sustain any school, college, or university controlled by any religious creed, church, or denomination; and whether the school receiving such aid is under the exclusive control of the officers of the public schools.

The court in *Riles*, however, did not address these issues. Instead, it read prior California case law as establishing a "child benefit" construction of article IX, section 8 and article XVI, section 5 and then responded to that construction. Rather than developing its two-pronged test entirely in response to deficiencies in the California case law construing the state constitution, the court responded primarily to the problems and "logically indefensible" results of the cases interpreting the establishment clause of the United States Constitution. Thus,

64. See Cal. Const. art. XVI, § 5.
65. See id.; id. art. IX, § 8.
66. Id.
67. See id. art. IX, § 8. That a literal construction is most appropriate is supported by other state court decisions involving provisions similar to the ones under consideration in *Riles*. For example, the Nebraska Constitution provided:

> neither the state Legislature nor any county, city or other public corporation, shall ever make *any appropriation* from any public fund, or grant any public land *in aid of any sectarian or denominational school or college*, or any educational institution which is not *exclusively owned and controlled* by the state or a governmental subdivision thereof. Gaffney v. State Dep't of Educ., 192 Neb. 358, 220 N.W.2d 550, 553 (1974) (emphasis supplied by court) (quoting Neb. Const. art. VII, § 11).

In holding a *Riles*-type textbook loan program invalid, the *Gaffney* court recognized that the proper issues were apparent on the face of the constitution:

> [T]o state the constitutional provision is to answer our question. By its terms the provisions [of the statute] furnish aid (in the form of textbooks) to private sectarian schools. By its terms the cost is paid by a public appropriation of tax funds. By its terms textbooks must be used and are given in aid of students in educational institutions which are not exclusively owned and controlled by the state or a governmental subdivision thereof.

Id. at 361-62, 220 N.W.2d at 553.

68. Specifically, *Bowker* employed the child benefit theory, and *Priest* espoused the concomitant principle "that an indirect, remote, or incidental benefit to a religious school does not violate the provisions of the California Constitution." 29 Cal. 3d at 807, 632 P.2d at 960, 176 Cal. Rptr. at 307.

69. In *Gaffney v. State Dep't of Educ.*, 192 Neb. 358, 220 N.W.2d 550 (1974), the Nebraska court rejected this approach:

> The question . . . here presented, is fundamentally different than the one presented by state action involving an examination of the standards set up by the United States Supreme Court under the Establishment Clause of the First Amendment. It is true the question under the Constitution of Nebraska and the Constitution of the United States both relate to the overall principle of separation of church and state. But, by its terms, the Constitution of Nebraska does not permit an examination of secular or sectarian purposes, a determination of primary or incidental benefit, or a balancing of the issues involved in state-church entanglement and political divisiveness. There is no ambiguity in our constitutional provision. . . . The standards . . . are whether there is a public appropriation, whether the grant is in aid of any sectarian or denominational school or
its test is not based upon proper considerations.

The court likely intended the first prong of its test to be a general response to the child benefit theory and, as a result, to the *Bowker* child benefit construction of the California Constitution.\(^7\) A child benefit analysis would necessitate holding the textbook loan program valid because the child receives the direct benefit of the aid, while the school receives only indirect and incidental benefits. The first prong of the *Riles* test refutes this rationale because it rests on the notion that the benefits to the children and school cannot be separated; it does not characterize the aid according to which party benefits more.\(^7\) No matter who actually receives the books, both the school and the child benefit, and the benefit to the sectarian school is more than indirect.\(^7\)

Although this part of the *Riles* test can thus be tied to cases construing the state constitution, the educational function prong, which is the real heart of the *Riles* test,\(^7\) has no basis in California precedent. Rather, it is a reaction to the United States Supreme Court's presumption that secular books would not be used to teach religion.\(^7\) This second prong of the *Riles* test is based on the contrary rationale that any state aid to the school's educational function inevitably supports its religious role because secular and religious functions are inextricably intertwined.\(^7\) However, the neutrality presumption has never been

---

\(^7\) Although prong one is a direct response to the child benefit concept, the court oddly does not refer to *Bowker* in its critique of that theory but only to *Board of Education v. Allen*—a United States Supreme Court case. This makes sense; the court wanted to respond directly to a textbook aid case decided under the child benefit theory, and *Allen* is such a case, where *Bowker* is not. However, the court does not discuss the effect that its holding will have on *Bowker* except to mention at the end of the opinion that it need not consider whether *Bowker* was correctly decided. *Bowker*, unlike the present case did not involve assistance to the educational function of parochial schools in the sense that textbooks aid that objective. Moreover, *Bowker* reasoned that bus transportation is analogous to the provision of generalized governmental services such as police and fire protection, which are granted in common with others, a rationale which is inapplicable to the textbook loan program.

\(^7\) Id.

\(^7\) *See infra* text accompanying notes 82-85.

\(^7\) This presumption was first established in *Allen* and was followed in both *Meek* and *Wolman*—all of which involved state aid in the form of textbook loan programs. *See supra* text accompanying notes 43-44, 50-52.

\(^7\) This reasoning follows the rationale employed by the United States Supreme Court in
used in state constitutional law cases, nor is it a necessary corollary to the child benefit theory. Thus, prong two is designed to remedy a problem within the federal establishment clause, not California law.\textsuperscript{76}

Another reason for developing the two-pronged test is the court's perception that child benefit analysis leads to "logically indefensible" results.\textsuperscript{77} If these inconsistent results were inherent in the child benefit rationale, then it could be said that the court developed its test in response to California law and anticipated future problems with it since \textit{Bowker} established child benefit as a part of California constitutional law. However, the inconsistent results are not a function of something wrong with the child benefit theory itself. Rather, they are the results of the Supreme Court reversing its approach to establishment clause cases generally while refusing to overturn the textbook rulings. Since

\textit{Meek}, 421 U.S. 349 (1975), which invalidated state loans of instructional material and equipment. There, the Court stated:

The very purpose of many [segregated] schools is to provide an integrated secular and religious education; the teaching process is, to a large extent, devoted to the inculcation of religious values and belief. . . . Substantial aid to the educational function of such schools, accordingly, necessarily results in aid to the sectarian school enterprise as a whole. "[T]he secular education those schools provide goes hand in hand with the religious mission that is the only reason for the schools' existence. Within the institution, the two are inextricably intertwined."

\textit{Id.} at 366 (quoting \textit{Lemon v. Kurtzman}, 403 U.S. 602, 654 (1971) (Brennan, J., concurring)).

76. That prong two of \textit{Riles} evolved from the United States Supreme Court's construction of the establishment clause is further supported by the dichotomy which the Court has established since \textit{Allen} between educational aid and aid for services that can be classified as health or welfare services. Note, \textit{supra} note 34, at 557. Although the \textit{Riles} court does not discuss the establishment clause decisions in this light, prong two looks surprisingly like the test Justice Marshall, dissenting in \textit{Wolman}, proposed—a test based on this dichotomy. Marshall would hold that the line between acceptable and unacceptable forms of aid should be drawn "between general welfare programs that serve children in sectarian schools because the schools happen to be a convenient place to reach the programs' target population and programs of educational assistance." \textit{Wolman}, 433 U.S. at 259 (Marshall, J., dissenting). Marshall argued that such welfare programs "do not provide "[substantial aid to the educational function" of the school, \textit{id.} (quoting \textit{Meek v. Pittenger}, 421 U.S. at 366), as do programs of educational assistance, "and therefore do not provide . . . assistance to the religious mission of sectarian schools." \textit{Id.} at 259-60. \textit{Compare Riles}, 29 Cal. 3d at 811-12, 632 P.2d at 963, 176 Cal. Rptr. at 310 (formulation of prong two) with \textit{Wolman}, 433 U.S. at 259-60 (Marshall, J., dissenting) (formulation of Marshall's establishment clause test).

77. 29 Cal. 3d at 809, 632 P.2d at 962, 176 Cal. Rptr. at 309. The "logically indefensible" results the court refers to are the inconsistencies among the \textit{Allen}, \textit{Meek} and \textit{Wolman} decisions. \textit{Id.} at 807-09, 632 P.2d at 960-62, 176 Cal. Rptr. at 307-09. For further treatment of these cases and their inconsistencies, see \textit{supra} notes 35-55 and accompanying text.

In stating that child benefit analysis leads to "logically indefensible" results, the court is unclear as to whether it is referring only to the child benefit theory or to the entire \textit{Allen} rationale—child benefit and the presumption of neutrality. In the preceding paragraph, the court refers to the neutrality presumption, so its subsequent reference to child benefit may be intended to include the presumption—a technically incorrect use of the term "child benefit." Regardless of what the court meant, however, the same argument applies: the change in theories generally, not any particular theory, has caused the "logically indefensible" results. In fact, if the court is including the presumption in the child benefit theory here, the argument that the \textit{Riles} test is a response to establishment clause concerns is even stronger, because the presumption of neutrality has never been a part of California law regarding the constitutionality of public aid to parochial schools.
Allen, the Court has reassessed its thinking and has rejected child benefit analysis and the presumption of neutrality, a retreat which has resulted in disallowing the public loan of instructional materials to sectarian schools.78

In addition, the Riles court saw it as “logically indefensible” that the Supreme Court in Wolman struck down funds for field trips while upholding loans of textbooks.79 While the inconsistent results between other instructional materials and textbooks were the consequence of the Court changing its mind as to how best to determine what the “primary effect” of the aid would be, the inconsistent treatment of field trips and textbooks stemmed also from the Court’s use of a new, post-Allen establishment clause rationale—the excessive entanglement test. An important reason for striking down funds for field trips was that permitting such funding would allow an excessive entanglement of government and religion by necessitating close supervision and surveillance of the student-teacher interaction. This entanglement concept is unique to establishment clause case law and has not been used by the California courts in construing either article IX, section 8 or article XVI, section 5.

Thus, changes in establishment clause theory, not defects in the child benefit theory, have caused the “indefensible” results. Although the Riles court may have believed it was responding to problems inherent in California’s child benefit theory, it was in fact responding to establishment clause problems.

While purportedly construing the California Constitution by responding to perceived problems with the child benefit theory, the court in effect developed a new test for construing the establishment clause—a development particularly problematic given the substantial differences between its wording and that of the California constitutional provisions.80

78. See Wolman v. Walter, 433 U.S. 229 (1977). The Court has continued to uphold textbook loans, but only in deference to stare decisis. Id. at 252 n.18.
79. 29 Cal. 3d at 809, 632 P.2d at 962, 176 Cal. Rptr. at 309.
80. Article I, § 4 of the California Constitution does have language that is almost identical to the federal establishment clause, but the Riles court does not mention its existence. Analyzing the loan program under that provision would have lent much greater credibility to the court’s discussion of federal case law, because the court may have felt compelled to explain why it was not construing the California establishment clause in the same way that the Supreme Court has construed the federal provision. See Johnson v. Huntington Beach Union High School Dist., 68 Cal. App. 3d 1, 15, 137 Cal. Rptr. 45, 51 (4th Dist. 1977); Mandel v. Hodges, 54 Cal. App. 3d 596, 616, 127 Cal. Rptr. 244, 257 (1st Dist. 1976). Nevertheless, the court probably chose not to apply article I, § 4 to the textbook loan program on the theory that because article IX, § 8 and article XVI, § 5 contain more explicit language and because they specifically govern school aid cases, they would take precedence over the more general establishment clause.
B. Failure to Fulfill California Constitutional Objectives

Despite its doubtful origins, the new test could be defended if it accomplished, however inadvertently, the objectives of the state constitution. This Section argues that the two-pronged test fails to achieve the constitution's objectives because a literal construction of the constitution best reflects the framers' objectives, and the Riles test allows public aid which would not be permitted by a literal construction.

The framers' objectives are clearly reflected in the plain language of the constitutional provisions. The sections were intended to ensure that public funds would only be used to support the schools created by the state in carrying out its educational responsibility, and to enforce state neutrality in the field of religion by guaranteeing that the power, authority, and financial resources of the government would never be devoted to the advancement of religion.

In determining whether the Riles test achieves these objectives, attention should be focused on the second prong—whether the character of the benefit results in support of a sectarian school. The first prong of the Riles test—whether the challenged aid only indirectly benefits parochial schools—does not determine the outcome, because, as the court noted, not all direct aid is prohibited, and not all indirect aid is valid. Therefore, regardless of whether the aid is direct or indirect, the pivotal question is whether it supports the educational function of a sectarian school. In fact, the court used language implying that whether direct aid is actually permissible and indirect aid impermissible depends on whether the aid supports the parochial school's educational function. Thus, given the questionable utility of the first prong, it is the second

81. See supra notes 2-3.
82. The court’s actual language is “expenditures for the immediate benefit of children.” 29 Cal. 3d at 811, 632 P.2d at 963, 176 Cal. Rptr. at 310. The court uses “direct” and “immediate” to convey very similar notions. See id. at 806, 632 P.2d at 960, 176 Cal. Rptr. at 307. Furthermore, throughout the opinion the court uses the terms “direct benefit to the child” and “indirect benefit to the school” as mutually exclusive. See, e.g., id. at 805, 807, 632 P.2d at 959, 960, 176 Cal. Rptr. at 306, 307. Hence, immediate aid to the child is direct aid to the child, which is indirect aid to the school.
83. Id. at 811, 632 P.2d at 963, 176 Cal. Rptr. at 310.
84. This raises the question why the court would set out prong one if indeed it is meaningless to the outcome. However, this question itself assumes that the court intended to make prong one in effect inoperative; perhaps it did not so intend. If the court did intend prong one to be superfluous, it may have included it in the Riles test because it wanted to refute the child benefit theory and turn attention from the directness or indirectness of a particular type of aid to whether the aid furthered the school’s educational function. Creating prong one let it do so without having to ignore or overrule Bowker and Priest.
85. Another reason for questioning the utility of prong one stems from the fact that the court gives no indication as to how far the “inseparability” notion extends. In Riles, benefits to the child from loans of textbooks were held to be inseparable from benefits accruing to the school from such loans. Conceivably, however, the “inseparability” concept could encompass all forms of aid, because no matter how indirect the aid might appear, the idea that the benefits are inseparable
part of the *Riles* test that must be evaluated in light of the constitutional objectives of article IX, section 8 and article XVI, section 5.

On a superficial theoretical level, one would not expect the *Riles* test to accomplish the constitution’s objectives simply because it asks a question completely different from those required by article IX, section 8 and article XVI, section 5. Prong two looks at whether the aid involves doctrinal content which furthers the educational function, while the constitutional provisions ask whether there has been a public appropriation or a grant of “anything,” whether the appropriation or grant is in aid of any religiously affiliated school, and whether the school receiving such aid is under the exclusive control of the officers of the public schools. Thus, the *Riles* test seems more narrow, so that it would allow more assistance than the constitution would permit.

This difference in wording is insignificant if the *Riles* test in effect asks the same questions the constitutional provisions do, thus yielding the same results and achieving the same objectives. In order to make such an assessment, it is necessary to determine what the court meant by the term “educational function of the school.” The court concluded that textbooks further the educational function of the school, but that government services, such as police and fire protection, do not. The critical distinction the court made is that textbooks have doctrinal content while government services do not. Thus, the key is to determine whether a particular form of aid has doctrinal content. Unfortunately, the court was unclear as to what it meant by “doctrinal content.” Nevertheless, however doctrinal content is defined, the court’s test would allow forms of public aid that would not be permitted under a literal construction of the constitution.

If the court’s language is taken literally to mean that the aid itself must have doctrinal content to be unconstitutional, then forms of aid like bus rides, funds for buildings, and pencils would be permissible because such items clearly have no doctrinal content of their own. This interpretation of the *Riles* test would not comport with state constitutional objectives because a state grant of funds for the construction of parochial school buildings or for buying pencils is clearly an appropriation of public funds which helps to establish and support or sustain a school system in opposition to the state public school system. Similarly, the provision of bus rides, while “assist[ing] . . . students to at-

---

86. *Id.* at 812, 632 P.2d at 963, 176 Cal. Rptr. at 310.
87. This would follow from the court’s distinction between textbooks and fire and police protection; textbooks themselves have inherent doctrinal content, while fire or police protection do not. *See id.*
tend parochial schools, . . . also aids those schools by bringing to them those very students for whom the parochial schools were established." 89

Alternatively, aid with doctrinal content could be read more broadly to include anything involved in the student-teacher-textbook interaction that is the heart of the "teaching-learning process." 90 Under this interpretation, providing funds for pencils would conceivably be invalid assistance because writing is a critical part of the learning process. Although providing bus rides arguably furthers the teaching-learning process by transporting the children to the site of the interaction and learning, the Riles court strongly suggests that bus rides would be allowable because such aid is closely analogous to governmental services and does not aid the educational function "in the sense that textbooks aid that objective." 91

The appropriation of state funds for parochial school buildings poses a paradoxical problem. While such aid is clearly a violation of state neutrality toward religion and is a grant of funds to schools other than those operated by the state, buildings are arguably more analogous to bus rides than to pencils. Like bus rides, they merely facilitate the occurrence of the student-teacher-textbook interaction by providing an enclosed site; however, they do not affect the content of that interaction or what is learned in the process, unlike pencils used for writing. Thus, this type of aid could be allowed 92 under either the literal or the broad interpretation of the Riles test. That the court let stand a decision giving parochial schools a financial break in obtaining loans for maintaining and improving facilities 93 demonstrates that such a result

90. The opinion can be interpreted in this manner if the court's allusions to "doctrinal content" and "education," 29 Cal. 3d at 812, 632 P.2d at 963, 176 Cal. Rptr. at 310, are read together to refer to that aspect of the child's education which involves doctrinal content. Thus, aid involves doctrinal content if it furthers the actual teacher-student-textbook interaction, which is characterized by the give and take of doctrinal content.
91. Id. at 813 n.16, 632 P.2d at 964 n.16, 176 Cal. Rptr. at 311 n.16.
92. If such a result were indeed possible, the anomaly which would occur in terms of dollars received by the school would be astounding. The public provision of textbooks involved in Riles would not have saved the schools a great deal of money because, in the absence of such a loan program, the parents would have been charged a rental fee for the books. Id. at 800, 632 P.2d at 956, 176 Cal. Rptr. 303. Such public assistance would be deemed by Riles to be unconstitutional, yet the grant of funds for construction of buildings, a benefit to the school of potentially millions of dollars, might be valid under the same test.

Even more realistic under Riles than the provision of funds for building classrooms would be the provision of funds for building student dormitories. This latter form of assistance is more consistent with the aid permitted in Priest because the statute in that case prohibited the low interest rates from being used to aid the construction of buildings in which religious activities would take place. Dormitories and dining halls, on the other hand, were allowed as long as they
is not altogether unlikely.\textsuperscript{94}

It is therefore evident that the \textit{Riles} test not only appears to be, but in fact is, different from what is contemplated by the California Constitution. Because \textit{Riles} allows forms of public aid that would be prohibited under a literal reading of the constitution, it fails to achieve the objectives the framers had in mind when they drafted the clear and explicit constitutional provisions prohibiting public support of sectarian schools.

\textbf{CONCLUSION}

In \textit{California Teachers Association v. Riles}, the California Supreme Court established a new test for determining when public aid to parochial schools is unconstitutional. However, the court developed that test in response to inconsistencies that had developed in cases decided under United States Supreme Court theories for construing the establishment clause of the first amendment rather than as a result of careful analysis of the meaning and objectives of the substantially different California provisions. Predictably, the court’s new test fails to achieve the requisite degree of state neutrality toward and noninvolvement in religion and religious schools because it allows forms of public aid that

---

\textsuperscript{94} This \textit{Priest}-type aid would also most likely be deemed impermissible under a literal construction of the constitution because it involves a grant of “anything”—an allocation of the power and authority of the government—to sectarian schools.
should be prohibited under article IX, section 8 and article XVI, section 5 of the California Constitution.
